AI-Powered Digital Vision Screening Report

Patient Name	Chavali Raja Sricharan	Report ID	23269343
Email	charankohli183@gmail.com	Generated	May 11, 2026 at 13:05 UTC

Risk Score: 54.0/100

HIGH RISK

Health Summary

Your screening has identified significant vision concerns. We strongly recommend scheduling an appointment with an eye specialist within the next 2-4 weeks.

Screening Results

Metric	Left Eye	Right Eye
Visual Acuity	0.8	1.4
Color Vision	37/100	—
Contrast Sensitivity	1.7	—
Field of View	50/100	—

Clinical Flags

- Color vision deficiency detected
- Peripheral vision loss indicated
- Diabetic patient — elevated risk of diabetic retinopathy
- Family history of eye conditions
- High screen time — digital eye strain risk

Personalized Recommendations

- Seek professional eye care evaluation as soon as possible
- Schedule a comprehensive eye examination with a qualified optometrist or ophthalmologist
- Follow the 20-20-20 rule: every 20 minutes, look at something 20 feet away for 20 seconds
- Ensure adequate lighting when reading or using screens
- Stay hydrated and maintain a diet rich in vitamins A, C, E and omega-3 fatty acids

SPECIALIST REFERRAL RECOMMENDED

Risk score and clinical flags indicate need for professional evaluation
